

City Carting buys Bollegraaf single stream system

September, 2013

After careful research, Stamford based City Carting bought a Bollegraaf single stream system from VAN DYK Recycling Solutions. The state-of-the-art system is engineered with the latest technology by Bollegraaf.

It will include Lubo renowned screening technology, large hoods for removal of film, four TITECH autosort 4 optical sorters (TITECH's newest model), a glass clean up system, and a Bollegraaf HCB 120 baler. It currently runs at 25 tons per hour.

The system is also prepared to sort SOP out of commercial loads in the future. Installation of the system in a brand new facility will begin in the fall of 2013. The system will start up in the beginning of 2014.

VAN DYK Recycling Solutions is North America's leading designer and system supplier of world-class recycling and recovery technology, and the exclusive distributor of Bollegraaf, Lubo, and TITECH machinery. We specialize in proven technology in the fields of sizing, sorting, recovery, and baling of recyclables. Our systems provide solutions for single stream, commercial waste, C&D, MSW, waste-to-energy/fuel, presorted plastics, and e-waste markets. Technologies in our arsenal include high-capacity pre-press flap balers, sensor based sorters, PaperMagnets®, StarScreens®, PaperSpikes®, density separators, air systems, trommel screens, and more. Boasting 2,400 profitable plants, our turnkey service fully equips with design, installation, training, and superior, lifelong support.
